Picture-mode (major) + Artist-mode (minor) cheat sheet

feature	action / command	description
move / point	C-f / <right>	forward char
	C-b / <left>	backward char
	C-n / <down>	next line
	C-p / <up>	previous line
	RET	set point (start/end/vertex)
	C-u RET	finalize poly-line
draw (mouse)	mouse-1 drag	draw with current operation
	shift-mouse-1	op variant (straight / square)
	mouse-2	choose operation (popup menu)
	mouse-3 drag	erase char
	shift-mouse-3	erase rectangle
	C-mouse-4 / C-mouse-5	cycle to prev / next operation
	< / >	toggle arrow at line start / end
pick drawing op	C-c C-a l / L	line / straight line
	C-c C-a r / s	rectangle / square
	C-c C-a p / P	poly-line / straight poly-line
	C-c C-a e / c	ellipse / circle
	C-c C-a t / T	text see-thru / overwrite
	C-c C-a S / z	spray-can / spray-can size
	C-c C-a C-d / E	erase char / erase rectangle
	C-c C-a v / V	vaporize line / connected lines
	C-c C-a C-k / M-w	cut / copy rectangle
	C-c C-a C-y	paste rectangle
	C-c C-a f	flood-fill
artist settings	C-c C-a C-l	set line character
	C-c C-a C-f	set fill character
	C-c C-a C-e	set erase character
	C-c C-a C-o	choose operation (menu)
	C-c C-a C-r	toggle rubber-banding
	C-c C-a C-t	toggle trim line-endings
	C-c C-a C-s	toggle borderless shapes

feature	action / command	description
type text (still picture)	any char	overwrite + move per set direction
	C-a / <home>	beginning of line
	C-e / <end>	end of line
set typing direction	C-c > / C-c <	right / left
	C-c ^ / C-c .	up / down
	C-c ’ / C-c ‘	NE / NW
	C-c / / C-c \\	SW / SE
	C-u before a diagonal	that diagonal uses 2-col horiz step
	C-c C-f / C-c C-b	repeat / reverse direction
	C-u N C-c C-f	repeat N times (rect edges)
line / char editing	DEL / C-d	clear char left / right (space)
	C-c C-d	delete char (shifts text)
	C-k	clear line (newline stays)
	C-S-backspace	remove whole line (shifts up)
	C-o	open line
	C-j	duplicate line
tabs	TAB / M-TAB	tab-stop / context-based tab
	C-c TAB	set stops from line context
	C-u C-c TAB	reset tab stops to default
	M-x edit-tab-stops	edit stops visually (ruler buffer)
	C-c C-c (in that buf)	install edited tab stops
rectangles	C-c C-k / C-c C-r	clear / draw rectangle
	C-c C-y / C-c C-w	yank rectangle / to register
	C-c C-x	yank rectangle from register
	C-u before yank	insert (shift text) vs. overwrite
shift whole art	select region, C-x TAB	start interactive rigid indent
	<right> / <left>	nudge every line in region 1 col
	S-<right> / S-<left>	nudge by a tab stop
	C-u N C-x TAB	shift region N cols right directly
